Facility Chiefs & Commissioning Dates

***** COMPILED BY W.A.BRENNAN *****

20
years
ago

During the assignment of the Author some 20 years ago as Deputy Chief of the Communications Division in Washington, he found need for a roster of Station Chiefs - hence made one up from Regional lists which he consolidated in his office. The tabulation records the name of the Chief Aircraft Communicator assigned in 1950. Added to the list, is the Chief of the FSS facility recorded in the National Field Office Directory of the FAA - 1970. The names of additional Chiefs and operating personnel have been included as recalled by the Author. Listing of Chiefs of the Alaska and Hawaii Regions are included under dateline of 1955.

Identifying legend used in listing is as follows: "5C" (Chief - 1950); "7C" (Chief in 1970); "1C" (First Chief if known), "2C" (Second Chief, if known, etc.). (C) Chief. Initial staffing complement will be identified by legend "ES" for First staffing. Other personnel recalled will be listed without prefix.

To make the list more useful, the date the facility was officially commissioned, as taken from the official records compiled under the direction of Mr. Henry S. Chandler (1-30-1959) will appear at the right of station listing. If the original date of establishment is known it will be marked (*) if other than the date shown which in some cases may indicate a "relocation" rather than the initial commissioning date of the facility.

Great care and much time has been spent in checking records so the listing/s are believed to be highly accurate and the author hopes useful - at least they may recall many nostalgic memories of people and places over the years.

HAYES CENTER MAY 1958
G.E. Lloyd 5C, Marion R. Neary C. 1942-43. XXX7. This station built and first staffed by UAL for Grand Island - Denver "cut-off" route. When station taken over by CAA, all personnel remained with UAL.

LEGEND

Facilities listed were those in operation circa 1950. Some facilities have been discontinued or are remotely controlled from other points, hence no longer staffed. Where no staffing is shown in FAA's 1970 National Field Directory, it is indicated by symbol "XXX7".

Other LEGEND used: 5C = Chief of facility 1950; 1C = First Chief, etc. FS = Names of first staff assigned. Date at right of geographical location indicates when station first commissioned or its relocation to new quarters. First date marked with asterisk (*) if known. "NR" indicates - no record available.

Facilities discontinued after the 1950 listing will be recorded alphabetically by name following "STATE" listings contained in these pages.

No claim is made that the list is complete. It is drawn from Society records and some cases from Regional Rosters, 720 Hour Check, Regional News releases etc. Regrettably, many cards of members are not complete and therefore we are unable to transfer data which would be of interest. We do think the names listed will recall old associates and colleagues we used to work with. They give us a flash-back of the nostalgic days gone by and will serve to record a part of history of our great organization before it becomes completely lost in the hazy mists of antiquity - which is, after all, a relative matter. W.A.B.

"YE ED" HAS FINALLY RUN OUT OF NAMES!!

STATION
COMBINED
TOWER

C
S
T

The combining of (FSS) Stations and Airport towers started July 1 1950 at Augusta, Georgia with the first consolidation of these two facilities. Near the end of 1950, two additional facilities had been combined at Peoria, Ill. and Brownsville, Texas. By 1959, a total of 82 facilities had been combined but it was found necessary at some locations later to "decombine" due to operational requirements or space factor Combined Station/Towers (CS/T) existing as of Jan. 1 1959 are listed below. The tabulation shows date (1) the facilities were combined and (2) Name of incumbent Chief, as of 1970.

REGION 1 - NY

AKRON, OH	7-6-53	X7
ALLENTOWN, PA.	5-12-54	J.D. Murphy

William A. LaRue

William A. "Bill" LaRue, one of the Society of Airway Pioneer's Charter members and Directors has been an innovator and leader since he first entered the Service back at "Hadley Field" in the early days of the Airways.

He was Chief at Camden, N.J., and Columbus, Ohio before transferring to Air Traffic Control about 1937. Since then he has held top positions in both fields

He was chosen to head an experiment, circa 1945, to consolidate the Field Branches of Communications and ATC into

an **AIRWAYS OPERATIONS DIVISION**. This program under LaRue's guidance was so successful that it was expanded system-wide.

LaRue was selected in 1952 as "Telecommunications Coordinator" (OCDM) in the Office of the President. Here he was a key official on "TCP" which handled "Top Level" Communications matters for the Government of the United States.

Later, LaRue became Manager for Martin Corp., as their Communications/Data-media expert. From here to Headquarters "NASA" as Executive Assistant to the Director of Advanced Manned Missions Program Office.

Since retirement, Bill LaRue has been called upon by the Board of Governors of the Federal Reserve System to study Communications requirements of that Agency.

Oh yes ... back in 1944 he "lamboned" (that is his word) Bill Breniman to become Editor of the "V-REGIONNAIRE". I am sure it is among his most outstanding accomplishments!

FAA

AMATEUR

RADIO NET

Thanks to PAUL COLBY whose address is 16 Camelia Drive, Ormond Beach, Fla., 32072, an **AMATEUR NETWORK** has been established for retired (and active) employees of the FAA and friends, to enable them to get together for a friendly "QSO" weekly over the "ham" bands.

Paul acts as NET CONTROL. The FAA NET has been operating for several years and each year the roster grows longer. If you would like to join, drop Paul a line for details - or better yet, tune in on one of their schedules, which are as follows:

EACH SUNDAY	SSB	7260	1345 GMT
EACH MONDAY	CW	14072	1500 GMT
EACH MONDAY	SSB	14240	1545 GMT

Errata

No author likes to admit to errors, but in working up this book - much of it was done under the pressure of time. A number of errors have since been noted for which your sympathetic understanding is respectfully requested.

The "element of controversy" always seems to exist when the subject is ... "WHO CAME FIRST ?".

This existed for years in the claim/s and feud between Dr. Langley and the Wright Brothers. Who discovered the NORTH POLE ? Was it indeed Admiral Robert E. Perry or Frederick A. Cook ? Who really invented WIRELESS ? Was it Professor Amos E. Dolbear, Mahlon E. Loomis, Guglielmo Marconi or Alexander S. Popoff ? Did Columbus REALLY discover America ? (Continued on Page 72)
